- Automated hematology analyzers, automated blood cell counts, state of the art, 104

B

- Bacterial infections**
 association of C (-260)→T polymorphism in CD14 promoter and *Chlamydia pneumoniae* infection in ischemic stroke patients, 595
 decreased mortality associated with prompt Gram stain for positive blood cultures, 870
Helicobacter pylori, virtual 3D microscopy using multiplane whole slide images in diagnosis of, 259
 scrub typhus diagnosis by immunohistochemical staining of *Orientia tsutsugamushi* in cutaneous lesions, 543
 suppurative inflammation with microabscess and pseudocyst formation is characteristic histologic manifestation of cutaneous infections with rapid-growing *Mycobacterium* species, 514
- Barrett esophagus**, immunohistochemical evaluation of panel of tumor cell markers during malignant progression of, 745
- Basal cell neoplasms**, CK5 is more sensitive than CK5/6 in identifying the "basal-like" phenotype of breast carcinoma, 724
- Bax**, cell cycle- and apoptosis-related markers in biliary tract cancer, clinical significance of, tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic cholangiocarcinomas, 780
- B-cell lymphomas**
 cytogenetic abnormalities detected by fluorescence in situ hybridization on paraffin-embedded chronic lymphocytic leukemia/small lymphocytic lymphoma lymphoid tissue biopsy specimens, 620
 diffuse large, follicular lymphoma variant translocation 1 gene expression in, correlates with subtype and clinical outcome, 957
 expression of serpin centerin defines germinal center phenotype in, 117
 non-Hodgkin, with dual *IgH-BCL2* and *BCL6* translocations, spectrum of, 193
 rituximab-induced changes in hematolymphoid tissues, found at autopsy, 604
- B cells**. *See also* B-cell lymphomas
 and rituximab-induced changes in hematolymphoid tissues, found at autopsy, 604
- BCL2**
 B-cell non-Hodgkin lymphoma with dual *IgH-BCL2* and *BCL6* translocations, spectrum of, 193
 cell cycle- and apoptosis-related markers in biliary tract cancer, clinical significance of, tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic cholangiocarcinomas, 780
- BCL6** translocation, B-cell non-Hodgkin lymphoma with *IgH-BCL2* translocation and, spectrum of, 193
- BD ProEx C**, detecting high-grade cervical disease on ASC-H cytology, role of and Digene Hybrid Capture II and, 765
- Behçet syndrome**, adhesion molecule expression in nodular lesions of, and other forms of panniculitis, comparative study of, 28
- Ber-EP4**, in useful antibody panel for differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, 771
- Bilirubin**, BiliChek noninvasive analyzer for prediction of serum bilirubin and risk of hyperbilirubinemia, evaluation of, 976
- Biomarkers**. *See also* Cardiac troponins; Tumor markers
 of acute cerebral infarction, potential, detected by SELDI-TOF-MS, 299
 anti-free immunoglobulin light chain monoclonal antibodies, immunodiagnostic capabilities of, 702
 for chemotherapy-induced cardiotoxicity prediction, systematic review of literature and recommendations for use, 688
 inflammatory markers and amino-terminal pro-brain natriuretic peptide and mortality risk in dyspneic patients, 305
 soluble ST2 plasma concentrations predict 1-year mortality in acutely dyspneic emergency department patients with pulmonary disease, 578
- Bladder urothelial carcinoma**
 changes in specimen preparation method may impact urine cytologic evaluation, 428
 chromosomal alterations detected by fluorescence in situ hybridization in, and rarer histologic variations of, 552
HER2 overexpression and amplification in, is associated with *MYC* coamplification in subset of cases, 274
- Blood cell counts**, automated, state of the art, 104
- Blood cultures**
 decreased mortality associated with prompt Gram staining of, 870
 improving quality of patient care in emergency department, a laboratory perspective, 573
- Bone marrow biopsies**
 and *JAK2^{V617F}* mutation in differential diagnosis between the "early" prepolycythemic phase of polycythemia vera and essential thrombocythemia, 336
 in patients 85 years or older, 832
- Book Review**, 643
- BRAF** gene, and high-resolution melting analysis for rapid detection of mutations in colorectal cancer, 247
- Breast neoplasms**
 carcinoma
 CK5 is more sensitive than CK5/6 in identifying the "basal-like" phenotype of, 724
 false-positive sentinel lymph nodes caused by benign glandular inclusions in breast cancer patients, report of three cases and review of literature, 21
 higher cutoff values for percentage of HER2+ cells decreases interobserver variability in interpretation of HER2 immunohistochemical analysis, 425
 immunohistochemically determined estrogen receptor phenotype remains stable in recurrent and metastatic breast cancer, 853, 879
- ductal carcinoma**
 infiltrating, differences and molecular immunohistochemical parameters in subtypes of, 414
 prognostic impact of marginal adipose tissue invasion in, 382
- HER2** amplification determination by in situ hybridization, when should chromosome 17 also be determined?, 920
- lobular neoplasia** and columnar cell alterations in tissue specimens, frequency and clinical significance of simultaneous association of, 254
- what causes HER2 testing discrepancies for?, Japanese ring study in conjunction with global standard, 883
- Bronchoalveolar lavage**, eosinophilic globules in fluid of patients with systemic sclerosis-related interstitial lung disease, a diagnostically useful, previously unreported finding in a retrospective and prospective study, including differential diagnosis with other idiopathic and secondary interstitial lung diseases, 927

C

- CA19-9, in useful antibody panel for differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, 771
- E-Cadherin, p120 catenin reduction and cytoplasmic relocation leads to dysregulation of, in solid pseudopapillary tumor of pancreas, 71
- Calretinin, in useful antibody panel for differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, 771
- Carcinoma
- bladder urothelial
 - changes in specimen preparation method may impact urine cytologic evaluation, 428
 - chromosomal alterations detected by fluorescence in situ hybridization in, and rarer histologic variations of bladder cancer, 552

Human herpes virus 8

- in cirrhosis patients, correlation with sex, alcoholism, hepatitis B virus, disease severity, and thrombocytopenia, 231
- viral studies in Burkitt lymphoma, association with Epstein-Barr virus but not, 186

- Human immunodeficiency virus (HIV), and viral studies in Burkitt lymphoma, association with Epstein-Barr virus but not HHV-8, 186

Human papillomavirus (HPV)

- clonality and HPV infection analysis of concurrent glandular and squamous lesions and adenosquamous carcinoma of uterine cervix, 389
- detecting high-grade cervical disease on ASC-H cytology, role of BD ProEx C and Digene Hybrid Capture II HPV DNA testing, 765
- high-risk HPV cervical infections, comparison of two methods for determining presence of, 401
- HPV-16 genotyping as benchmark for cervical biopsy specimen interpretation, 65, 162

- Hybrid Capture II, detecting high-grade cervical disease on ASC-H cytology, role of BD ProEx C and, 765

- Hyperbilirubinemia, BiliChek noninvasive analyzer for prediction of serum bilirubin and risk of, evaluation of, 976

- Hypermethylation, and differences and molecular immunohistochemical parameters in subtypes of infiltrating ductal breast cancer, 414

Hyperplasia

- columnar cell, and lobular neoplasia and in breast tissue specimens, frequency and clinical significance of simultaneous association of, 254
- lobular endocervical glandular, preoperative screening for gastric mucin secretion in cervical discharge by HIK1083-labeled latex agglutination test, clinical impact of, 585

I

- IgH-BCL2* translocation, B-cell non-Hodgkin lymphoma with *BCL6* translocation and, spectrum of, 193

- Immature platelet fraction, automated blood cell counts, state of the art, 104
- Immature reticulocyte fraction, automated blood cell counts, state of the art, 104
- Immunity, innate, and distribution, proliferation, and function of Paneth cells in uncomplicated and complicated adult celiac disease, 34
- Immunoassay
 - anti-free immunoglobulin light chain monoclonal antibodies, immunodiagnostic capabilities of, 702
 - comparison of emergency department patient classification by point-of-care and central laboratory methods for cardiac troponin I, 132
 - hemostatic factors in EDTA plasma, measurement of, 811
- Immunoelectrophoresis, and urine protein electrophoresis using unconcentrated or minimally concentrated urine samples, 141
- Immunoglobulin light chain monoclonal antibodies, anti-free, immunodiagnostic capabilities of, 702
- Immunohistochemistry
 - bronchogenic cyst distinguished from metastatic testicular teratoma, a light microscopic and immunohistochemical study, 265
 - Burkitt lymphoma in Brazil is characterized by geographically distinct clinicopathologic features, 946
 - CK5 is more sensitive than CK5/6 in identifying the "basal-like" phenotype of breast carcinoma, 724
 - differences and molecular immunohistochemical parameters in subtypes of infiltrating ductal breast cancer, 414
 - differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, useful antibody panel for, 771
 - estrogen receptor phenotype remains stable in recurrent and metastatic breast cancer, 853, 879
 - folliculitis decalvans, immunopathogenesis of, clues in early lesions, 526
 - glypican 3 immunostaining, in hepatocellular carcinoma diagnosis, on needle biopsy, value of, 219
 - HER2 overexpression and amplification in urothelial carcinoma of the bladder is associated with *MYC* coamplification in subset of cases, 274
 - HER2 testing discrepancies for breast cancer, what causes?, Japanese ring study in conjunction with global standard, 883
 - higher cutoff values for percentage of HER2+ cells decreases interobserver variability in interpretation of HER2 analysis, 425
 - nasal-type extranodal NK/T-cell lymphoma, characterization of, using tissue microarray, 343
 - occludin and claudins 1, 3, 4, and 7 expression in urothelial carcinoma of the upper urinary tract, 43
 - osteopontin expression in malignant pleural mesothelioma, prognostic role of, 58
 - panel of tumor cell markers during malignant progression of Barrett esophagus, evaluation of, 745
 - rituximab-induced changes in hematolymphoid tissues, found at autopsy, 604
 - scrub typhus diagnosis by immunohistochemical staining of *Orientia tsutsugamushi* in cutaneous lesions, 543
 - transketolase-like 1 expression and activation of Akt in grade IV glioblastomas compared with grades II and III astrocytic gliomas, 50
 - viral studies in Burkitt lymphoma, association with Epstein-Barr virus but not HHV-8, 186
- Immunophenotyping, by flow cytometry, CD23+ mantle cell lymphoma as clinical pathologic entity associated with superior outcome compared with CD23- disease, 159, 166
- Immunostaining
 - with antibodies to desmoglein provides diagnosis of drug-induced pemphigus and allows prediction of outcome, 369
 - glypican 3, in hepatocellular carcinoma diagnosis, on needle biopsy, value of, 219
- Inclusion bodies, false-positive sentinel lymph nodes in breast cancer patients caused by benign glandular inclusions, report of three cases and review of literature, 21
- Infant, newborn, parameters of thromboelastography in healthy, 99
- Infection. *See also* Bacterial infections; Infectious diseases
 - frozen section analysis for hip and knee joint revisions, reassessment of usefulness of, 363
- Infectious diseases
 - clonality and HPV infection analysis of concurrent glandular and squamous lesions and adenosquamous carcinoma of uterine cervix, 389
 - new *Mycobacterium* species causing diffuse lepromatous leprosy, 849, 856
 - single-tube screen for *Salmonella* and *Shigella*, 284
 - suppurative inflammation with microabscess and pseudocyst formation is characteristic histologic manifestation of cutaneous infections with rapid-growing *Mycobacterium* species, 514
- Inflammation, suppurative, with microabscess and pseudocyst formation is characteristic histologic manifestation of cutaneous infections with rapid-growing *Mycobacterium* species, 514
- Inflammatory markers, as mortality predictor for dyspnea, 305
- In situ hybridization. *See also* Fluorescence in situ hybridization
 - viral studies in Burkitt lymphoma, association with Epstein-Barr virus but not HHV-8, 186
- Interleukin-1 receptor, soluble ST2 plasma concentrations predict 1-year mortality in acutely dyspneic emergency department patients with pulmonary disease, 578
- Internal medicine, which laboratory tests do students in clerkship in need to learn about?, 696
- International normalized ratio, capillary whole blood, accuracy of on CoaguChek S, CoaguChek XS, and i-STAT1 point-of-care analyzers, 88
- Interobserver variability
 - HER2 testing discrepancies for breast cancer, what causes?, Japanese ring study in conjunction with global standard, 883
 - higher cutoff values for percentage of HER2+ cells decreases, in interpretation of HER2 immunohistochemical analysis, 425
 - thyroid follicular lesions with borderline nuclear features of papillary carcinoma, and intraobserver variation among experts in diagnosis of, 683, 736
- Interstitial lung disease, eosinophilic globules in bronchoalveolar lavage fluid of patients with systemic sclerosis-related, a diagnostically useful, previously unreported finding in a retrospective and prospective study, including differential diagnosis with other idiopathic and secondary interstitial lung diseases, 920
- Intestine, small, histopathology of diaphragm disease of, study of 10 cases from single institution, 518

Isochromosome 7q, incidence of *TCR* and *TCL1* gene translocations and, in peripheral T-cell lymphoma, using fluorescence in situ hybridization, 178

J

JAK2^{V617F} mutation, and bone marrow biopsy in differential diagnosis between the "early" prepolycythemic phase of polycythemia vera and essential thrombocythemia, 336

K

Kaposi sarcoma-associated herpesvirus. *See* Human herpes virus 8
 Ki-67, and distribution, proliferation, and function of Paneth cells in uncomplicated and complicated adult celiac disease, 34
 Kidney, small renal masses, pathologic characteristics of, can they be predicted by preoperative clinical parameters?, 560
 Knee joint, frozen section analysis for hip and knee joint revisions, reassessment of usefulness of, 363
KRAS gene, high-resolution melting analysis for rapid detection of mutations in colorectal cancer, 247

L

Laboratory information systems, application of 3-D Δ check graphs to HbA_{1c} quality control and HbA_{1c} utilization, 292
 Laboratory tests, which tests do students in internal medicine clerkship need to learn about?, 696
 Larynx, squamous cell carcinoma of, human DNA topoisomerase II- α expression in, and its correlation with clinicopathologic variables, 934
 Latent nuclear antigen, anti-HHV-8, viral studies in Burkitt lymphoma, association with Epstein-Barr virus but not HHV-8, 186
 Latex agglutination test, HIK1083-labeled, preoperative screening for gastric mucin secretion in cervical discharge by, clinical impact of, 585
 Length of stay, emergency department, improving quality of patient care, a laboratory perspective, 573
 Leprosy, diffuse lepromatous, new *Mycobacterium* species causing, 849, 853
 Leukemia
 acute promyelocytic, array-based comparative genomic hybridization characterizes deletion associated with a t(15;17) in, 818
 chronic lymphocytic/small lymphocytic lymphoma, cytogenetic abnormalities detected by fluorescence in situ hybridization on paraffin-embedded lymphoid tissue biopsy specimens from, 620
 Leukocyte differential count, automated blood cell counts, state of the art, 104
 Leukocytosis, and bone marrow biopsies in patients 85 years or older, 832
 Liver. *See also* Liver neoplasms
 cirrhosis, human herpes virus 8 in patients with, correlation with sex, alcoholism, hepatitis B virus, disease severity, and thrombocytopenia, 231

Liver neoplasms

 cholangiocarcinomas, clinical significance of cell cycle- and apoptosis-related markers in biliary tract cancer, a tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic, 780
 hepatocellular carcinoma, glypican 3 immunostaining in diagnosis of, on needle biopsy, value of, 219

Lobular neoplasia, and columnar cell alterations in breast tissue specimens, frequency and clinical significance of simultaneous association of, 254

Lucio phenomenon, new *Mycobacterium* species causing leprosy with, 856

Lung. *See also* Lung neoplasms

 eosinophilic globules in bronchoalveolar lavage fluid of patients with systemic sclerosis-related interstitial lung disease, a diagnostically useful, previously unreported finding in a retrospective and prospective study, including differential diagnosis with other idiopathic and secondary interstitial lung diseases, 920

 soluble ST2 plasma concentrations predict 1-year mortality in acutely dyspneic emergency department patients with pulmonary disease, 578

Lung neoplasms

 bronchioloalveolar carcinoma and well-differentiated pulmonary adenocarcinoma, lessons learned from mistakes and deferrals in frozen section diagnosis of, an evidence-based pathology approach, 11

 endobronchial ultrasound-guided transbronchial fine-needle aspiration, University of Minnesota experience, with emphasis on usefulness, adequacy assessment, and diagnostic difficulties, 434

 malignant pleural mesothelioma treated with extrapleural pneumonectomy, histologic assessment and prognostic factors of, 754

 osteopontin expression in malignant pleural mesothelioma, prognostic role of, 58

Lymphatic invasion, prognostic impact of marginal adipose tissue invasion in ductal carcinoma of the breast, 382

Lymph nodes

 methylene blue-assisted lymph node dissection in colon specimens, a prospective, randomized study, 913

 prognostic impact of marginal adipose tissue invasion in ductal carcinoma of the breast, 382

 rituximab-induced changes in hemolymphoid tissues, found at autopsy, 604

Lymphocytes

 folliculitis decalvans, immunopathogenesis of, clues in early lesions, 526

 lymphocytic esophagitis, a chronic or recurring pattern of esophagitis resembling allergic contact dermatitis, 508

Lymphoma

 ALK+ anaplastic large cell, myeloid antigen CD13 and/or CD33 expression as marker for, 628

B-cell

 expression of serpin centerin defines germinal center phenotype in, 117

 rituximab-induced changes in hemolymphoid tissues, found at autopsy, 604

 B-cell non-Hodgkin, with dual *IgH-BCL2* and *BCL6* translocations, spectrum of, 193

Burkitt

 in Brazil is characterized by geographically distinct clinicopathologic features, 946

- viral studies in, association with Epstein-Barr virus but not HHV-8, 186
- chronic lymphocytic leukemia/small lymphocytic, cytogenetic abnormalities detected by fluorescence in situ hybridization on paraffin-embedded lymphoid tissue biopsy specimens from, 620
- diffuse large B-cell, follicular lymphoma variant translocation 1 gene expression in, correlates with subtype and clinical outcome, 957
- mantle cell, CD23+ as clinical pathologic entity associated with superior outcome compared with CD23- disease, 159, 166
- nasal-type extranodal NK/T-cell, immunohistochemical characterization of, using tissue microarray, 343
- peripheral T-cell
 - FoxP3 expression in, evaluation of, 613
 - incidence of *TCR* and *TCL1* gene translocations and isochromosome 7q in, using fluorescence in situ hybridization, 178

M

- Mean platelet volume, automated blood cell counts, state of the art, 104
- Medical education, which laboratory tests do students in internal medicine clerkship need to learn about?, 696
- Medical error
 - amended reports, development and validation of taxonomy of defects for, 238
 - detecting surgical pathology error, effectiveness of random and focused review in, 905
- Melanoma, primary cutaneous desmoplastic, cytologic features of metastatic and recurrent melanoma in patients with, 715
- Melting analysis, high-resolution, for rapid detection of *KRAS*, *BRAF*, and *PIK3CA* gene mutations in colorectal cancer, 247
- Mesothelioma
 - malignant pleural
 - osteopontin expression in, prognostic role of, 58
 - treated with extrapleural pneumonectomy, histologic assessment and prognostic factors of, 754
 - peritoneal, useful antibody panel for differential diagnosis between ovarian serous carcinoma and, in Japanese cases, 771
- MET, immunohistochemical evaluation of panel of tumor cell markers during malignant progression of Barrett esophagus, 745
- Metastasis
 - bronchogenic cyst distinguished from metastatic testicular teratoma, a light microscopic and immunohistochemical study, 265
 - cytologic features of metastatic and recurrent melanoma in patients with primary cutaneous desmoplastic melanoma, 715
 - immunohistochemically determined estrogen receptor phenotype remains stable in recurrent and metastatic breast cancer, 853, 879
- Methylene blue-assisted lymph node dissection in colon specimens, a prospective, randomized study, 913
- Microcalcifications, and frequency and clinical significance of simultaneous association of lobular neoplasia and columnar cell alterations in breast tissue specimens, 254
- Micrometry, quantitative assessment of subepithelial collagen band does not increase accuracy of diagnosis of collagenous colitis, 333, 375
- Microscopy
 - light, bronchogenic cyst distinguished from metastatic testicular teratoma, a light microscopic and immunohistochemical study, 265
 - virtual 3D, using multiplane whole slide images in diagnostic pathology, 259
- MOC-31, in useful antibody panel for differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, 771
- Molecular diagnostics. *See also* DNA analysis; Polymerase chain reaction
 - new *Mycobacterium* species causing diffuse lepromatous leprosy, 849, 856
- Monoclonal antibodies
 - anti-free immunoglobulin light chain, immunodiagnostic capabilities of, 702
 - and nested PCR for noninvasive prenatal diagnosis of hemoglobinopathies in India, evaluation of use of, 202
 - preoperative screening for gastric mucin secretion in cervical discharge by HIK1083-labeled latex agglutination test, clinical impact of, 585
- Monoclonal gammopathies, urine protein electrophoresis and immunoelectrophoresis using unconcentrated or minimally concentrated urine samples, 141
- Mucins, gastric, preoperative screening for secretion in cervical discharge by HIK1083-labeled latex agglutination test, clinical impact of, 585
- Mucosa, colonic, in collagenous colitis, 375
- Mutations
 - bone marrow biopsy and *JAK2*^{V617F} mutation in differential diagnosis between the "early" prepolycythemic phase of polycythemia vera and essential thrombocythemia, 336
 - carrier detection in Glanzmann thrombasthenia, comparison of flow cytometry and Western blot with respect to DNA mutation, 93
 - high-resolution melting analysis for rapid detection of *KRAS*, *BRAF*, and *PIK3CA* mutations in colorectal cancer, 247
- MYC
 - HER2* overexpression and amplification in urothelial carcinoma of the bladder is associated with coamplification of, in subset of cases, 274
 - immunohistochemical evaluation of panel of tumor cell markers during malignant progression of Barrett esophagus, 745
- Mycobacterium*
 - new species causing diffuse lepromatous leprosy, 849, 856
 - suppurative inflammation with microabscess and pseudocyst formation is characteristic histologic manifestation of cutaneous infections with rapid-growing species, 514
- Mycobacterium leprae*, 849, 856
- Mycobacterium lepromatosis* sp nov, 849, 856
- Myelodysplastic syndrome, and bone marrow biopsies in patients 85 years or older, 832
- Myeloid antigens, and CD13 and/or CD33 expression as marker for ALK+ anaplastic large cell lymphoma, 628
- Myeloma
 - and α_1 -antitrypsin deficiency, serum protein electrophoresis for detection of, 568
 - multiple, immunodiagnostic capabilities of anti-free immunoglobulin light chain monoclonal antibodies, 702
 - plasma cell, bone marrow biopsies in patients 85 years or older, 832
- Myeloproliferative disorders, p38 mitogen-activated protein kinase

has different degrees of activation in myeloproliferative syndromes and, 635

Myeloproliferative syndromes, p38 mitogen-activated protein kinase has different degrees of activation in myeloproliferative disorders and, 635

Myocardial infarction, ultrasensitive cardiac troponin I dynamic changes in new definition of, impact of, 964

Myoepithelial markers, and false-positive sentinel lymph nodes in breast cancer patients caused by benign glandular inclusions, report of three cases and review of literature, 21

N

Nasal cavity, p63 expression in olfactory neuroblastoma and other small cell tumors of the sinonasal tract, 213

Natriuretic peptides

amino-terminal pro-brain, as mortality predictor for dyspnea, 305

cardiac, biochemical markers for prediction of chemotherapy-induced cardiotoxicity, systematic review of literature and recommendations for use, 688

Natural killer cells, nasal-type extranodal NK/T-cell lymphoma, immunohistochemical characterization of, using tissue microarray, 343

Needle biopsy. *See also* Core needle biopsy; Fine-needle aspiration biopsy

glypican 3 immunostaining in hepatocellular carcinoma diagnosis, value of, 219

Neuroblastoma, olfactory, p63 expression in other small cell tumors of the sinonasal tract and, 213

Neurotropic factor receptor α -1, glial cell line-derived, expression in immature teratomas, 892

Nodular lesions, of Behçet syndrome and other forms of panniculitis, adhesion molecule expression in, comparative study of, 28

Noninvasive procedures

eosinophilic globules in bronchoalveolar lavage fluid of patients with systemic sclerosis-related interstitial lung disease, a diagnostically useful, previously unreported finding in a retrospective and prospective study, including differential diagnosis with other idiopathic and secondary interstitial lung diseases, 927

monoclonal antibodies and nested PCR for prenatal diagnosis of hemoglobinopathies in India, evaluation of use of, 202

Nonsteroidal anti-inflammatory drugs, and histopathology of diaphragm disease of small intestine, study of 10 cases from single institution, 518

Nucleated red blood cells

automated blood cell counts, state of the art, 104

monoclonal antibodies and nested PCR for noninvasive prenatal diagnosis of hemoglobinopathies in India, evaluation of use of, 202

O

Occludin, expression of claudins 1, 3, 4, and 7, and, in urothelial carcinoma of the upper urinary tract, 43

Orientia tsutsugamushi, scrub typhus diagnosis by immunohistochemical staining of, in cutaneous lesions, 543

Osteopontin, expression in malignant pleural mesothelioma, prognostic role of, 58

Ovarian neoplasms

glypican 3 expression in germ cell tumors, 224

useful antibody panel for differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, 771

P

p16^{INK4a}, alterations in p16^{INK4a}/cyclin D1/RB pathway in gastrointestinal tract endocrine tumors, 535

p16 protein

cell cycle- and apoptosis-related markers in biliary tract cancer, clinical significance of, tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic cholangiocarcinomas, 780

immunohistochemical evaluation of panel of tumor cell markers during malignant progression of Barrett esophagus, 745

p38 mitogen-activated protein kinase, has different degrees of activation in myeloproliferative disorders and myeloproliferative syndromes, 635

p53 protein

Burkitt lymphoma in Brazil is characterized by geographically distinct clinicopathologic features, 946

cell cycle- and apoptosis-related markers in biliary tract cancer, clinical significance of, tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic cholangiocarcinomas, 780

immunohistochemical evaluation of panel of tumor cell markers during malignant progression of Barrett esophagus, 745

p63 protein

Burkitt lymphoma in Brazil is characterized by geographically distinct clinicopathologic features, 946

expression in olfactory neuroblastoma and other small cell tumors of the sinonasal tract, 213

p120 catenin, reduction, and cytoplasmic relocation leads to dysregulation of E-cadherin in solid pseudopapillary tumor of pancreas, 71

Pancreatic neoplasms, solid pseudopapillary tumor, p120 catenin reduction and cytoplasmic relocation leads to dysregulation of E-cadherin in, 71

Paneth cells, in uncomplicated and complicated adult celiac disease, distribution, proliferation, and function of, 34

Panniculitis, adhesion molecule expression in nodular lesions of Behçet syndrome and other forms of, 28

Papanicolaou smear, in cervical cancer patients treated with radiochemotherapy followed by radical surgery, accuracy of, 787

Papillary neoplasms, thyroid follicular lesions with borderline nuclear features of papillary carcinoma, interobserver and intraobserver variation among experts in diagnosis of, 683, 736

Pemphigus, drug-induced, immunostaining with antibodies to desmoglein provides diagnosis of, and allows prediction of outcome, 369

Periodic acid-Schiff, and eosinophilic globules in bronchoalveolar lavage fluid of patients with systemic sclerosis-related interstitial lung disease, a diagnostically useful, previously unreported finding in a retrospective and prospective study, including differential diagnosis with other idiopathic and secondary interstitial lung diseases, 920

- Peritoneum, mesothelioma of, useful antibody panel for differential diagnosis between ovarian serous carcinoma and, in Japanese cases, 771
- Personal digital assistants (PDAs), containing laboratory test information for students in internal medicine clerkship, 696
- Phlebotomy, improving quality of patient care in emergency department, a laboratory perspective, 573
- PIK3CA* gene, and high-resolution melting analysis for rapid detection of mutations in colorectal cancer, 247
- Platelet antibodies, modification of solid phase red cell adherence assay for detection of, in patients with thrombocytopenia, 455
- Platelet distribution width, automated blood cell counts, state of the art, 104
- Platelet refractoriness, and modification of solid phase red cell adherence assay for detection of platelet antibodies in patients with thrombocytopenia, 455
- Platelets, carrier detection in Glanzmann thrombasthenia, comparison of flow cytometry and Western blot with respect to DNA mutation, 93
- Pleura
malignant pleural mesothelioma treated with extrapleural pneumonectomy, histologic assessment and prognostic factors of, 754
osteopontin expression in malignant pleural mesothelioma, prognostic role of, 58
- Pneumonectomy, extrapleural, histologic assessment and prognostic factors of malignant pleural mesothelioma treated with, 754
- Point-of-care testing
accuracy of capillary whole blood international normalized ratio on CoaguChek S, CoaguChek XS, and i-STAT1 analyzers, 88
comparison of emergency department patient classification by point-of-care and central laboratory methods for cardiac troponin I, 132
- Polycythemia vera, "early" prepolycythemic phase of, bone marrow biopsy and *JAK2^{V617F}* mutation in differential diagnosis between essential thrombocythemia and, 336
- Polymerase chain reaction
Burkitt lymphoma in Brazil is characterized by geographically distinct clinicopathologic features, 946
Epstein-Barr viral load assay using QIAGEN Artus EBV TM PCR analyte-specific reagent, validation of, 865
nested, and monoclonal antibodies for noninvasive prenatal diagnosis of hemoglobinopathies in India, evaluation of use of, 202
viral studies in Burkitt lymphoma, association with Epstein-Barr virus but not HHV-8, 186
- Prenatal diagnosis, monoclonal antibodies and nested PCR for noninvasive diagnosis of hemoglobinopathies in India, evaluation of use of, 202
- Prostate cancer
percentage of tumor and tumor length in biopsy specimens of, study of American veterans, 940
tumor length in, 77
- Prostate-specific antigen
and percentage of tumor and tumor length in prostate biopsy specimens, study of American veterans, 940
and tumor length in prostate cancer, 77
- Protease inhibitors, serpin centerin expression defines germinal center phenotype in B-cell lymphomas, 117
- Prothrombinase-induced clotting time assay, for determination of anticoagulant effects of unfractionated and low-molecular weight heparins, fondaparinux, and thrombin inhibitors, 446
- Pseudocysts, suppurative inflammation with microabscess and formation of, is characteristic histologic manifestation of cutaneous infections with rapid-growing *Mycobacterium* species, 514
- Pseudopapillary tumor, solid, of pancreas, p120 catenin reduction and cytoplasmic relocation leads to dysregulation of E-cadherin in, 71
- ## Q
- QIAGEN Artus EBV TM PCR analyte-specific reagent, Epstein-Barr viral load assay using, validation of, 865
- Quality assurance
application of 3-D Δ check graphs to HbA_{1c} quality control and HbA_{1c} utilization, 292
detecting surgical pathology error, effectiveness of random and focused review in, 905
and HPV-16 genotyping as benchmark for cervical biopsy specimen interpretation, 65
human-derived D-dimer for external quality assessment, results of four surveys in Ontario, 805
improving quality of patient care in emergency department, a laboratory perspective, 573
- ## R
- Radiotherapy, Papanicolaou smears in cervical cancer patients treated with radiochemotherapy followed by radical surgery, accuracy of, 787
- Recurrent disease
cytologic features of metastatic and recurrent melanoma in patients with primary cutaneous desmoplastic melanoma, 715
immunohistochemically determined estrogen receptor phenotype remains stable in recurrent and metastatic breast cancer, 853, 879
- Red blood cells distribution width, automated blood cell counts, state of the art, 104
- Regulatory T cells, and FoxP3 expression in peripheral T-cell lymphoma, evaluation of, 613
- Reporting, amended reports, development and validation of taxonomy of defects for, 238
- Residents, pathology, initial assessment of fine-needle aspiration specimens by telepathology, validation for use in faculty consultations with, 409
- Reticulocyte counts, automated blood cell counts, state of the art, 104
- Retinoblastoma protein, alterations in *p16^{INK4a}/cyclin D1/RB* pathway in gastrointestinal tract endocrine tumors, 535
- Rituximab, induced changes in hematolymphoid tissues, found at autopsy, 604
- RpoT* gene, and new *Mycobacterium* species causing diffuse l epromatous leprosy, 856
- Russell viper venom test, and activated partial thromboplastin time-based screening assays for activated protein C resistance, comparison of, 796

S

- Salivary gland, collagenous crystalloids in myoepithelial carcinoma of, case report and review of literature, 355
- Salmonella*, single-tube screen for, 284
- Schistocytes (fragmented RBCs), automated blood cell counts, state of the art, 104
- Sclerosis, systemic, eosinophilic globules in bronchoalveolar lavage fluid of patients with systemic sclerosis-related interstitial lung disease, a diagnostically useful, previously unreported finding in a retrospective and prospective study, including differential diagnosis with other idiopathic and secondary interstitial lung diseases, 920
- Screening
- for activated protein C resistance, Russell viper venom-based and activated partial thromboplastin time-based assays for, comparison of, 796
 - single-tube screen for *Salmonella* and *Shigella*, 284
- Sentinel lymph nodes, in breast cancer patients, false-positives caused by benign glandular inclusions, report of three cases and review of literature, 21
- Serpins, centerin expression defines germinal center phenotype in B-cell lymphomas, 117
- Shigella*, single-tube screen for, 284
- Sickle cell disease, differences in erythrocyte sedimentation rate using Westergren method and a centrifugation method, 127
- Sinonasal tract, p63 expression in olfactory neuroblastoma and other small cell tumors of the, 213
- 16S ribosomal RNA gene, 856
- Skin. *See also* Skin cancer
- scrub typhus diagnosis by immunohistochemical staining of *Orientia tsutsugamushi* in cutaneous lesions, 543
 - suppurative inflammation with microabscess and pseudocyst formation is characteristic histologic manifestation of cutaneous infections with rapid-growing *Mycobacterium* species, 514
- Skin cancer, primary cutaneous desmoplastic melanoma, cytologic features of metastatic and recurrent melanoma in patients with, 715
- SMAD4, in immunohistochemical evaluation of panel of tumor cell markers during malignant progression of Barrett esophagus, 745
- Small cell tumors, p63 expression in olfactory neuroblastoma and other sinonasal tract tumors, 213
- Solid phase red cell adherence assay, modification of, for detection of platelet antibodies in patients with thrombocytopenia, 455
- SOX9 expression in colorectal cancer, analysis of, 897
- Sphingolipids, and follicular lymphoma variant translocation 1 gene expression in diffuse large B-cell lymphoma correlates with subtype and clinical outcome, 957
- Spleen, rituximab-induced changes in hematolymphoid tissues, found at autopsy, 604
- Spongiosis, lymphocytic esophagitis characterized by, 508
- Sprue, refractory, and distribution, proliferation, and function of Paneth cells in uncomplicated and complicated adult celiac disease, 34
- Squamous cells. *See also* Atypical squamous cells of undetermined significance
- adenosquamous cervical carcinoma, clonality and HPV infection analysis of concurrent glandular and squamous lesions and, 389

human DNA topoisomerase II- α expression in squamous cell carcinoma of the larynx, and its correlation with clinicopathologic variables, 934

ST2 protein, soluble ST2 plasma concentrations predict 1-year mortality in acutely dyspneic emergency department patients with pulmonary disease, 578

Standardization, human-derived D-dimer for external quality assessment, results of four surveys in Ontario, 805

Stroke

ischemic, association of C (-260) \rightarrow T polymorphism in CD14 promoter and *Chlamydia pneumoniae* infection in patients with, 595

potential biomarkers of, detected by SELDI-TOF-MS, 299

Suppurative inflammation, with microabscess and pseudocyst formation is characteristic histologic manifestation of cutaneous infections with rapid-growing *Mycobacterium* species, 514

Surface-enhanced laser desorption/ionization time-of-flight mass spectrometry (SELDI-TOF-MS), potential biomarkers of acute cerebral infarction detected by, 299

Surgical pathology

detecting error in, effectiveness of random and focused review in, 905

multi-institutional survey of critical diagnoses (critical values) in cytology and, 681, 731

T

T-cell lymphoma

nasal-type extranodal NK/T-cell lymphoma, immunohistochemical characterization of, using tissue microarray, 343

peripheral

FoxP3 expression in, evaluation of, 613

incidence of *TCR* and *TCL1* gene translocations and isochromosome 7q in, using fluorescence in situ hybridization, 178

T-cell receptor (*TCR*) gene, incidence of *TCR* and *TCL1* gene translocations and isochromosome 7q in peripheral T-cell lymphoma, using fluorescence in situ hybridization, 178

TCL1 gene translocations, incidence of *TCR* gene translocations and isochromosome 7q, and, in peripheral T-cell lymphoma, using fluorescence in situ hybridization, 178

Telepathology, initial assessment of fine-needle aspiration specimens by, validation for use in pathology resident-faculty consultations, 409

Teratoma

immature, glial cell line-derived neurotrophic factor receptor α -1 expression in, 892

metastatic testicular, bronchogenic cyst distinguished from, a light microscopic and immunohistochemical study, 265

Testicular teratoma, metastatic, bronchogenic cyst distinguished from, a light microscopic and immunohistochemical study, 265

Thalassemia, Sebia Capillarys capillary electrophoresis and Primus high-pressure liquid chromatography in evaluation of hemoglobinopathies, comparison of, 824

ThinPrep, changes in specimen preparation method may impact urine cytologic evaluation, 428

Thrombasthenia, Glanzmann, carrier detection in, comparison of flow cytometry and Western blot with respect to DNA mutation, 93

- Thrombocythemia, essential, bone marrow biopsy and *JAK2*^{V617F} mutation in differential diagnosis between the "early" prepolycythemic phase of polycythemia vera and, 336
- Thrombocytopenia
 human herpes virus 8 in cirrhosis patients, correlation with sex, alcoholism, hepatitis B virus, disease severity, and, 231
 modification of solid phase red cell adherence assay for detection of platelet antibodies in patients with, 455
- Thrombocytosis, and bone marrow biopsies in patients 85 years or older, 832
- Thromboelastography, parameters of, in healthy newborns, 99
- Thrombomodulin, in useful antibody panel for differential diagnosis between peritoneal mesothelioma and ovarian serous carcinoma in Japanese cases, 771
- Thrombophilia
 mutationally well-characterized cohort of severe hemophilia with associated, reduced clinical severity in, 84
 Russell viper venom-based and activated partial thromboplastin time-based screening assays for activated protein C resistance, comparison of, 796
- Thyroid gland, follicular lesions of, with borderline nuclear features of papillary carcinoma, interobserver and intraobserver variation among experts in diagnosis of, 683, 736
- Tissue microarray
 Burkitt lymphoma in Brazil is characterized by geographically distinct clinicopathologic features, 946
 cell cycle- and apoptosis-related markers in biliary tract cancer, clinical significance of, tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic cholangiocarcinomas, 780
 differences and molecular immunohistochemical parameters in subtypes of infiltrating ductal breast cancer, 414
 immunohistochemical characterization of nasal-type extranodal NK/T-cell lymphoma using, 343
- Topoisomerase II- α , expression in squamous cell carcinoma of the larynx, and its correlation with clinicopathologic variables, 934
- Transketolase-like 1, expression of, and activation of Akt in grade IV glioblastomas compared with grades II and III astrocytic gliomas, 50
- Trastuzumab (Herceptin)
 and *HER2* amplification determination by in situ hybridization, when should chromosome 17 also be determined?, 920
 HER2 testing discrepancies for breast cancer, what causes?, Japanese ring study in conjunction with global standard, 883
- Troponins, cardiac. *See* Cardiac troponins
- t(15;17) translocation, array-based comparative genomic hybridization characterizes deletion associated with a, in acute promyelocytic leukemia, 818
- Tumor length
 and percentage of tumor in prostate biopsy specimens, study of American veterans, 940
 in prostate cancer, 77
- Tumor markers
 cell cycle- and apoptosis-related markers in biliary tract cancer, clinical significance of, tissue microarray-based approach revealing distinctive immunophenotype for intrahepatic and extrahepatic cholangiocarcinomas, 780
 differences and molecular immunohistochemical parameters in subtypes of infiltrating ductal breast cancer, 414
 immunohistochemical evaluation of panel of markers during malignant progression of Barrett esophagus, 745
- Tumor metastasis. *See* Metastasis
- Turnaround time
 decreased mortality associated with prompt Gram stain for positive blood cultures, 870
 improving quality of patient care in emergency department, a laboratory perspective, 573
- Typhus, scrub, diagnosis by immunohistochemical staining of *Orientia tsutsugamushi* in cutaneous lesions, 543
- ## U
- Ultrasound, endobronchial ultrasound-guided transbronchial fine-needle aspiration, 434
- Urinalysis, urine protein electrophoresis and immunoelectrophoresis using unconcentrated or minimally concentrated urine samples, 141
- Urinary cytology, changes in specimen preparation method may impact, 428
- Urinary tract, upper, expression of occludin and claudins 1, 3, 4, and 7 in urothelial carcinoma of the, 43
- Urothelial neoplasms
 bladder carcinoma
 changes in specimen preparation method may impact urine cytologic evaluation, 428
 chromosomal alterations detected by fluorescence in situ hybridization in, and rarer histologic variations of, 552
 HER2 overexpression and amplification in, is associated with *MYC* coamplification in subset of cases, 274
 occludin and claudins 1, 3, 4, and 7 expression in urothelial carcinoma of the upper urinary tract, 43
- UroVysion probe set, fluorescence in situ hybridization with, chromosomal alterations in urothelial carcinoma and rarer histologic variations of bladder cancer detected by, 552
- ## V
- Vasculitis, nodular, adhesion molecule expression in nodular lesions of Behçet syndrome and other forms of panniculitis, comparative study of, 28
- Ventricular dysfunction, left, biochemical markers for prediction of chemotherapy-induced cardiotoxicity, systematic review of literature and recommendations for use, 688
- Viral load testing, for Epstein-Barr virus, using QIAGEN Artus EBV TM PCR analyte-specific reagent, validation of, 865
- Virtual microscopy, 3D, using multiplane whole slide images in diagnostic pathology, 259
- von Willebrand factor, hemostatic factors in EDTA plasma, measurement of, 811
- ## W
- Westergren ESR method, differences in rate compared with centrifugation method, 127
- Western blot analysis, carrier detection in Glanzmann thrombasthenia, comparison of flow cytometry and, with respect to DNA mutation, 93
- ## Y
- Yolk sac tumors, glypican 3 expression in ovarian and extragonadal germ cell tumors, 224
- Young Investigator Awards Program Abstracts, 469
